

KRA 1 Impact on Mental Health

Improving the lives of individuals with serious mental illness...

Supporting the person and family by improving the care, they receive during all points of the illness:

- Programs enhancing the quality of life, resulting in long-term, consumer driven supports for employment, education, housing, medical care, socialization, and transportation
- Projects providing engagement, stabilization, and resilience, improving function and helping consumers become more self-sufficient
- Reducing long-term dependence on care systems and increasing hope for wellness at all points of illness

Engaging stakeholders for improving the care delivery system:

- Programs resulting in holistic, integrated, and cost-effective solutions for addressing system gaps
- Projects providing basic needs and minimizing instances of crisis
- Promoting creative solutions, new ideas, evidence-based practices, and collaborative efforts for nurturing high levels of recovery

Empowering all to improve public understanding and compassion:

- Engaging leaders and change agents, disrupting the status quo, accelerating knowledge sharing, informing policy discussion, and rewarding impact
- Deepening mental health knowledge, increasing public understanding, and building an effective mental health workforce
- Advancing mental health literacy by promoting early identification of mental disorders, reducing stigma, and enhancing help-seeking behaviors.
